

**WAKE UP!**

systems, depending on whether you need 24-hour or night-time coverage. All our systems provide night-time coverage using a powerful under-pillow pad that vibrates to wake you in the event of a fire.

- For portable 24-hour coverage we have the Bellman paging system. You can carry the receiver around with you and be alerted wherever you are.
- If you only want night-time coverage, when you might not have your hearing aids in, then our smoke alarm is the most cost-effective option. It comes with a vibrating pad that goes under your pillow.

With the smoke alarm and paging systems, we have different detector options to choose from, depending on what you want to be alerted to.

- Ionisation detectors are particularly sensitive to free-burning fires, like chip pan fires. They detect these fires before the smoke becomes thick.
- Optical detectors are effective at detecting slow-burning fires, like overheated electrical wiring, and are less likely to go off accidentally while cooking.
- Heat detectors detect heat, rather than smoke. They are normally used as an add-on to an existing system.

### Paging systems

Instead of buying separate alerting devices (and carrying several receivers around) you can buy one integrated system that alerts you to everything on one handy, wireless device. Simply choose the transmitters you want together with a receiver.

## All our alerting devices use amplified sounds, flashing lights or vibration to alert you.

### Doorbells

Some plug in to sockets, while others are battery-powered portable units that you carry around with you, so you can be alerted anywhere in the house or garden. When someone presses the doorbell, it activates a chime and/or a flashing light on either the plug-in or portable receiver to attract your attention.

### Baby monitors

These are portable, so you can be alerted to your baby waking or crying whether you are in the house or garden. We have baby alarm packs that can also be used as part of our paging systems.

### Alarm clocks

Our alarm clocks are louder than standard ones, but they also have vibrating pads that

you slip under your pillow to wake you up. Some have bright flashing lights, too.

### Telephone ringers

We have several products that will let you know when your telephone is ringing. Some connect to your telephone socket using a doubler, while others have a microphone that can attach to the telephone ringer. You can increase the volume of your telephone ringer and there are also options to add a vibrating pad so you can be alerted at night.

### Wristwatch alarms

These watches vibrate at your chosen time, so you can't miss the alert. Some people like to wear the watches in bed and use them as alarm clocks, because the vibration is less likely to wake their partner.

### Smoke alarms

We have smoke alarms that have been designed specifically for people with hearing loss. We have wired or wireless

## 10 Doorbells

### Libra+ flashing door chime

This is our most popular portable door chime and is ideal for use in the home or garden. When the bell push has been pressed, a chime and/or a blue flashing light is activated to attract your attention to visitors at your door.

- Up to 20 flashes
- Loudness approx 89dB at 1m (max setting)
- Adjustable volume
- Choice of flash, sound, or flash and sound
- Choice of six chime melodies: Ding Dong, St Clements, Westminster, Tube Chime, Warm Brass, Fantasy
- Up to 200m range depending on obstructions
- Size: 140 x 110 x 40mm

### Options available

#### A231 Libra+ flashing door chime

**£44.99** not VAT exempt  
4 x C cell batteries included

### Accessories

#### A231A Additional bell push

**£14.17** not VAT exempt

#### A231D Extra or replacement receiver

#### A270 Libra+ audio transmitter

Alerts you to someone pressing your intercom  
**£31.20** not VAT exempt

**This is a good door chime and flashing light which works very well - just what I needed.**

Donald Ryan

### Libra+ telephone ringer

This very useful accessory for the Libra+ receiver plugs into your telephone socket and alerts you to an incoming telephone call. This product cannot be used without the Libra+ receiver. There are two different sounds and icons that light up to differentiate between the telephone and the doorbell.

- Supplied with telephone doubler
- Size: 35 x 90 x 19mm

#### A231E Libra+ telephone ringer

**£42.83** not VAT exempt

### Libra+ flashing door chime and telephone ringer pack

This is a combination pack of the door chime and telephone ringer.

- For sizes, see A231 and A231E

#### A246 Libra+ ringer pack

**£87.82** not VAT exempt

## Portable flashing door chime

This doorbell is flexible enough to suit most people's requirements. It can be taken anywhere in the home or garden up to 100m from the bell push, depending on obstructions. You can also mount it on the wall if you would prefer to keep it in one place. The unit is battery operated and the bell push can be fixed to the outside of the doorframe. The unit can be set to flash, chime or flash and chime together.

- Up to 23 flashes
- Loudness approx 79dB at 1m (max setting)
- Adjustable push button volume control on receiver
- Wall mountable
- Choice of three melodies: Ding Dong, Ding Dong Dong, Westminster
- Up to 100m range depending on obstructions
- Size: 115 x 155 x 50mm

### A174 Portable flashing door chime

**£28.22** not VAT exempt  
3 x C cell batteries included

### Accessories

#### A174B Additional bell push

**£8.23** not VAT exempt

#### A174C Extra or replacement receiver

**£24.10** not VAT exempt

**Worked very well. Very loud. Could transport to other parts of the house.**  
Maurice Blow, Southampton

## Flashing doorbell

This portable door chime alerts you to the doorbell using a range of eight amplified melodies and a powerful flashing light. The light flashes rapidly for up to 10 seconds after the doorbell is pressed.

- Loudness of up to approx. 81dB at 1m (max setting)
- Bright flashing light
- Adjustable volume
- Choice of eight melodies: Tubular 3-Note, Big Ben, Tubular 2-Note, Solo, Tubular Score, Clarinet, Saxophone, Morning Dew
- Up to 100m range, depending on obstructions
- Size: 142 x 75 x 75

### A268 Flashing door chime

**£38.99** Not VAT exempt  
3 x C cell batteries and 1 x CR2032 battery included.

## 12 Doorbells

### Rechargeable door chime

Our only rechargeable wire-free door chime with a light indicator and rechargeable receiver - so no need to worry about changing its batteries. Simply place the receiver in the cradle when recharging.

- Lights up to 16 times
- Loudness of approx 85dB at 1m (max setting)
- Choice of eight melodies: Ding Dong, Westminster, Jive, Wedding March, Piano, Harmony, Dog Barking, Ringer
- Battery low warning light
- Up to 100m range, depending on obstructions
- Size: 130 x 80 x 40mm

#### A205 Rechargeable door chime

**£41.88** not VAT exempt  
Built-in battery included

### Accessories

#### A205A Additional bellpush

**£10.36** not VAT exempt

### Portable vibrating door chime

A portable door chime system with both a vibrating and audible alert. You can clip the receiver on your belt or put it in a pocket so you can feel it vibrating whenever someone is at the door. Or you could just have an audible alert and the door chime can be wall mounted. This product can also be used as a person-to-person short range alerting system - ideal for calling someone out of hearing range, perhaps in the garden or garage.

- Up to 16 flashes
- Loudness of approx 77dB at 1m (max setting)
- Choice of flash with sound and vibration, vibration, or sound only
- Choice of eight chime melodies
- Up to 100m range, depending on obstructions
- Size: 90 x 90 x 45mm

#### A204 Portable vibrating door chime

**£30.53** not VAT exempt  
2 x AA batteries included

### Flashing door chime

This battery powered door chime alerts you to the doorbell using a bright flashing light and six amplified melodies. It's completely portable, so you can take it anywhere in the house or garden and always know when there's someone at the door.

- The light flashes rapidly for up to 10 seconds after the doorbell is pressed.
- Loudness of up to approx 74dB
- Flashing white ultra-bright LED light
- Volume control
- Six chime melodies: Tubular 3-Note, Big Ben, Tubular 2-Note, Solo, Tubular Score, Clarinet
- Up to 100m range, depending on obstructions
- Size: 109 x 75 x 46mm

#### A269 Flashing door chime

**£29.99** not VAT exempt  
3 x AA batteries included

### Libra plug-in door chime

This door chime is completely wire-free and requires no batteries. Simply plug the receiver in and it will ring and flash to alert you to the doorbell. The unit has a modern design and since it plugs in, it's discreet and doesn't take up any valuable space.

- Up to 20 flashes
- Loudness of approx 75dB at 1m (max setting)
- Rotary volume control
- Choice of flash, sound, or flash and sound
- Choice of three melodies: Ding Dong, St Clements, Westminster
- Up to 150m range, depending on obstructions
- Size: 107 x 70 x 65mm

**A249 Libra plug-in door chime**  
**£46.44** not VAT exempt

**Before I used to sit near the window for ages if I knew a caller is coming. Now I can relax in my chair and the door chime flashes.**  
 Ivy Race, East Yorkshire

### Flashing plug-in doorbell

This door chime alerts you to the doorbell using a range of six amplified melodies and a powerful flashing light. It plugs into a mains socket, so you can move it into different rooms when necessary.

- The light flashes rapidly for up to 10 seconds after the doorbell is pressed.
- Loudness of up to approx 77dB
- Bright xenon flash

- Volume control
- Six chime melodies: Tubular 3-Note, Big Ben, Tubular 2-Note, Solo, Tubular Score, Clarinet
- Up to 100m range, depending on obstructions
- Size: 112 x 75 x 53mm

**A267 Flashing plug-in door chime**

**£29.99** not VAT exempt

## 14 Doorbells

### Door beacon

A simple device that clips onto a door using a hanging bracket. It detects the vibration of someone knocking at the door and activates a flashing light. It is battery operated and portable, so it's ideal for using on holiday or when staying with friends.

- Easily attached to the door using hanging bracket, velcro or screws
- Ideal for offices, bedrooms and bathrooms
- Size: 80 x 80 x 58mm

#### A130 Door beacon

**£20.44** exc VAT

**£24.53** inc VAT

1 x 9v PP3 battery included

### The Mountcastle

The Mountcastle system causes lights in your home to flash or dim when the doorbell is activated – flashing or dimming the lights on during the day and off during the evening. The more sophisticated model, the 291A/DT, has a timer circuit so that the lights can flash or dim for four to eight seconds when the doorbell is pressed.

You can also add extra options to the main system to alert you to the telephone or textphone ringing, or link it to your door entry system.

- Size: 135 x 170 x 80mm

### Options available

#### A116 91D for single lighting circuits (flats or bungalows)

**£95.20** inc VAT

#### A133 Silent bell door entry alert

**£74.00** exc VAT

**£88.80** inc VAT

**Please note: a professional electrician must wire these systems into your home lighting circuit.**

Classic

Pro

## Bellman alarm clocks

There are three versions of this alarm clock: the Classic and the Pro (detailed here) and then the Visit (on page 26) which connects to the Bellman paging system.

The Classic wakes you using an amplified alarm and a vibrating pad that goes under your pillow. The audible alarm uses different sound frequencies, so whether you find high or low pitched sounds hard to hear, there will be a tone to suit you. It also gets louder the longer you leave the alarm.

The clock reduces the snooze interval from nine to two minutes in two minute steps.

- Vibrating pad included
- Audible alarm changes tone
- Volume increases the longer you leave the alarm
- Snooze interval starts at nine minutes and reduces after each snooze
- Bright clear screen and large controls
- Size: 132 x 146 x 85mm

### B1350 Bellman Classic alarm clock

£41.66 exc VAT

£49.99 inc VAT

The Pro has all the benefits of the Classic plus some useful additional features.

There are four flashing lights and each one is as bright as the flash on a compact camera.

If you sometimes need to get up during the night you'll find the soft blue night-light handy.

The gentle glow is bright enough to guide you but not harsh on your eyes.

It also has a battery backup feature that keeps all the alarm features working during a power cut.

- Vibrating pad included
- Audible alarm changes tone
- Volume increases the longer you leave the alarm
- Snooze interval starts at nine minutes and reduces after each snooze
- Bright clear screen and large controls
- Four bright flashing lights
- Soft blue night-light
- Battery backup
- Size: 132 x 146 x 85mm

### B1370 Bellman Pro alarm clock

£70.82 exc VAT

£84.98 inc VAT

## Sonic Boom Classic

This traditional analogue alarm clock has a vibrating pad you can slip under your pillow to help wake you. The alarm is easy to set – there is no 'AM' or 'PM' to worry about.

The blue back-lit display has adjustable brightness. Pushing the snooze button lights up the display, which is handy if you need to know the time after several snoozes.

- Vibrating pad included
- Adjustable volume and tone control
- Choice of alarm settings – audible alarm, vibration, flash or all three
- Bright blue back-light that flashes when the alarm rings
- Adjustable display brightness
- Battery backup to maintain the proper time in the event of a power failure
- Large analogue screen
- Snooze button (four minutes)
- Size: 140 x 140 x 70mm

### A244 Sonic Boom Classic

£27.48 exc VAT

£32.98 inc VAT

### Sonic Boom 200

This alarm clock is easy to use and offers several different ways of waking you. The vibrations from the Sonic Boom are strong enough to wake the heaviest of sleepers and with a choice of vibrating and audible alerts, there is little chance of ignoring it!

The clock is compact so it won't take up too much room on a bedside table, but it still has large clear numbers on the display.

- Adjustable volume and tone control
- Vibrating pad included
- Choice of alarm settings - audible alarm, vibration or both
- Large display with adjustable brightness
- Battery backup to maintain the time in the event of a power failure (the clock display will not be illuminated)
- Snooze button (nine minutes)
- Size: 90 x 155 x 50mm

#### A240 Sonic Boom alarm clock

**£26.65** exc VAT

**£31.98** inc VAT

### Sonic Dual

What makes this clock so useful is that it allows you to set two different alarms at different times. This means you don't have to reset the alarm if your partner gets up later.

This is our biggest clock and has a very large display and a vibrating pad to slip under your pillow to help wake you. The clock is mains powered with a battery backup.

- Vibrating pad included
- Adjustable volume and tone control
- Choice of alarm settings - audible, vibrate or both
- Adjustable display brightness
- Very large digital display - numbers are approx 45mm high
- Battery backup to maintain the time in the event of a power failure (the clock display will not be illuminated)
- Snooze button (nine minutes)
- Size: 128 x 230 x 50mm

#### A245 Sonic Dual alarm clock

**£37.48** exc VAT

**£44.98** inc VAT

### Wake 'n' Shake

This mains powered digital alarm clock is a very popular choice with our customers. It has the largest display of all our clocks, with numbers 50mm high. It can wake you with its amplified alarm, strobe light and strong vibrating pad. You can even connect the clock to the telephone so that it vibrates to alert you to the phone ringing.

- Vibrating pad included
- Large 50mm red LED display
- Can connect to a telephone to alert you when it rings
- Four alarm settings for the clock and telephone ringer: vibrating pad only, alarm and vibrating pad, flash and alarm, flash only
- Adjustable volume and tone
- Battery backup to maintain the time in the event of a power failure (the clock display will not be illuminated)
- Snooze button (nine minutes)
- Size: 125 x 195 x 60mm

#### A177 Wake 'n' Shake

**£29.75** exc VAT

**£35.70** inc VAT

**No other alarm clock woke my daughter up from sleep. The vibration is very powerful. She also liked the big display. She is very happy.**

Jahera Hussain, London

NEW

### Talking alarm with wireless pad

This clock is ideal if you have a visual impairment and/or a hearing loss. The vibrating pad wakes you if you are unable to hear an alarm. If you have sight loss then the talking feature is useful because you can hear the time when you press the snooze button. You can also set two different alarms, ideal when your partner has to wake at a different time. You can even choose which days of the week the alarms are activated. The clock can plug into your telephone socket and vibrate to alert you to calls.

- Wireless vibrating pad
- Adjustable volume
- Announces time and day when you press snooze button
- Choice of audible alarm, vibration or flashing light
- Can alert you to phone ringing
- Two alarms can be set for different times and days
- Five different alarm melodies
- Battery backup to maintain the time in the event of a power failure (the clock display will not be illuminated)
- Snooze button - choice of five or 15 minutes
- Size: 130 x 146 x 80mm

**£45.83** exc VAT

**£55.00** inc VAT

NEW

### Analogue clock with wireless pad

This clock has a wireless pad so you can be woken from a nap anywhere in your home without having to unplug the alarm clock and reset the time. The clock can be plugged into your telephone socket using the connection lead and telephone doubler (supplied). The wireless pad will then vibrate to alert you when the telephone is ringing.

- Wireless vibrating pad
- Adjustable alarm volume

- Choice of audible alarm, vibration or flashing light
- Can alert you to phone ringing
- Five different alarm melodies
- Battery backup to maintain the time in the event of a power failure
- Snooze button - choice of five or 15 minutes
- Size: 132 x 146 x 85mm

A250

### Vibralite 3 digital vibrating watch

The vibrating watches in this range have two alarm functions. You can set two reminders, alerting you to two different tasks during the day, or you can set an alarm that will go off at regular intervals.

The intervals can be set in seconds, minutes or hours. This can be useful if you need to take medication regularly, or when cooking.

This is a good watch for travelling as it has a second clock that can be set to a different time zone.

- The alarm can vibrate, beep or both
- Two separate alarms
- Reminder alert option – a 10 and five minute warning before the countdown alert hits zero
- Stopwatch function to one-hundredth second
- Second time zone display
- Back-light for viewing display at night
- 12hr and 24hr displays
- Size: 40 x 40 x 15mm

### Vibralite 8 digital vibrating watch

With similar functions to the Vibralite 3, this watch has the additional feature of a large, easy-to-read face that clearly displays the time, day and date. With eight different vibration alarms, you can be reminded of events during the day or night wherever you are.

- The alarm can vibrate, beep, or both
  - Reminder alert option – a 10 and five minute warning before the countdown alert hits zero
  - Stopwatch function to one-hundredth second
  - Three time zones
  - Large digits on the display
  - Back-light for viewing display at night
  - 12hr and 24hr displays
  - Size: 40 x 40 x 15mm
- Watch straps and battery are not covered under the one year warranty

## Bellman Visit 24 hour baby alarm

This baby alarm provides day and night time cover with up to 200m operating range, depending on obstructions. Choose your alert from vibrating pager (SS104), sound and visual alert (SS105) or flashing light (SS106). By plugging in the vibrating pad, you can be alerted if your baby wakes at night. These baby alarm packs can also be used as part of the Bellman Visit paging system (pages 26-33).

You can use up to four transmitters at once and be alerted to up to four children. Ideal if you need to know which child needs attention.

**Each pack contains vibrating pad, baby cry transmitter and the receiver of your choice.**

### Options available

## Digital Plus baby alarm

This digital baby monitor vibrates and displays coloured lights to alert you if your baby wakes up or cries. You can move around freely, because the small and compact design is ideal to carry in your pocket or clip to your belt. With an operating range of up to 350m, you can stay in touch with your baby wherever you are in your home or garden. This baby alarm is for daytime alerting because there is no vibrating pad to put under your pillow at night.

- Sound level light display
- Adjustable volume control
- Parent and baby unit can be battery operated or mains powered
- Belt clip for receiver
- Range of up to 350m, depending on obstructions
- Two-way talk back facility
- Low battery and out-of-range alarm
- Two levels of sound sensitivity
- Multi-coloured nightlight
- Vibration alert option
- Temperature display on both parent and baby units
- Timer to help keep track of feeding and sleeping
- Size: 95 x 65 x 25mm (parent unit) 70 x 130 x 130mm (baby unit)

#### A257 Digital Plus baby alarm

**£81.68** not VAT exempt

### Action on Hearing Loss smoke alarm system (BS5446-3)

Our wired smoke alarm system has been designed exclusively for people who are deaf or hard of hearing. Complying with the requirements of safety standard BS5446-3 it incorporates the latest technology in fire security for people with hearing loss. Once the smoke detector is installed, place the main base unit by your bed and the vibrating pad under your pillow. If the system detects a fire, the strong strobe light flashes on the base (excellent for day and night time alerting). The powerful under-pillow pad vibrates to wake even the heaviest sleeper. This wired smoke alarm system is extremely flexible and can be extended to suit your needs. Up to nine additional detectors can be added.

- Compliant with British safety standards (BS5446-3:2005)
- Continuous fault monitoring with clear indicator showing mains power status. Also warns of any fault with pad and detector cabling or connection
- Mains powered (1.9m mains lead) with an internal rechargeable battery for 100 hours of standby time in the event of a power failure
- Combined flashing xenon light and a vibrating pillow pad for day and night time protection

- The unit can be placed on a bedside table or can be wall mounted
- Easy to use dedicated junction box to keep cables tidy
- Built-in user guide - no more hunting for the instructions when you most need them
- Dedicated button for testing the system
- Size: 75 x 180 x 135mm

## Bellman Visit 868 smoke alarms

These standard wireless smoke alarm packs are also available.

### SS100 – Smoke alarm pack 1 includes (pictured above):

- Pager
- Pager charger
- Smoke alarm (ionisation)
- Vibrating pad for overnight use

**£223.48** exc VAT

**£268.18** inc VAT

### SS101 – Smoke alarm pack 2 includes:

- Flash receiver without backup batteries
- Smoke alarm (ionisation)
- Vibrating pad for overnight use

**£144.62** exc VAT

**£173.54** inc VAT

### SS102 – Smoke alarm pack 3 includes:

- Flash receiver with backup batteries
- Smoke alarm (ionisation)
- Vibrating pad for overnight use

**£143.07** exc VAT

**£171.68** inc VAT

## Ringflash 100

This amplified ringer lets you know when your phone is ringing. It also flashes making it even easier to notice. If you have a telephone on your bedside table the vibrating pad accessory will help wake you if you receive a night-time call.

- Loudness of approx 84dB at 1m (max setting)
- Choice of alert – flash and sound, flash and vibrating pad, or sound and vibrating pad
- Three ringer melodies
- Telephone lead of 2m
- Mains power lead of 2m
- Size: 130 x 120 x 120mm

**£19.99** inc VAT

## CL1L Telephone ringer with bright flash

This simple device has a loud ringtone and bright yellow strobe light to alert you to incoming phone calls. The unit plugs into your telephone socket with a telephone doubler (included). There is an optional vibrating pad so you can be alerted at night.

- Loudness of approx 90dB at 1m (max setting)
- Mains power lead of 1.5m
- Adjustable ringing tone
- Choice of alert – strobe and sound, strobe and vibrating pad, or sound and vibrating pad (pad not included)
- Telephone lead of 2.5m
- Size: 180 x 120 x 45mm

### A180 CL1L telephone ringer

Please see pages 26-33 for more information on Bellman Visit systems.

## 24 Telephone alerts

2 year warranty

### Bellman telephone ringer

This device is a simple way of amplifying the volume of your telephone ringer. It connects to the telephone socket using the doubler supplied. You can also choose an outdoor accessory to alert you to calls when you are outside your home, in the garage or garden.

- Loudness of approx 80dB at 1m (max setting)
- Four levels of volume, tone and ring pattern
- Telephone lead of 2.5m
- Size: 155 x 90 x 32mm

#### A157 Bellman telephone ringer

**£13.65** exc VAT

**£16.38** inc VAT

4 x AA batteries included

### Accessories

#### A158 Bellman outdoor ringer with 10m lead

**£12.40** not VAT exempt

- Size: 102 x 115 x 115mm

A158

### Ring Plus for telephone or door entry

The Ring Plus can be used for alerting you to either the telephone or doorbell. You have a choice of audible and flashing light alerts. It has a microphone pick-up to attach to the telephone ringer, or to alert you to other sounds, such as a door entry buzzer.

Please note this product will only alert you to the telephone or the doorbell - not both at the same time.

- Loudness of approx 88dB at 1m (max setting)
- Bright white strobe
- Mains power lead of 1.8m
- Pick-up microphone with 5m lead
- Not suitable for textphones
- Size: 185 x 115 x 35mm

#### A102 Ring Plus

**£29.99** not VAT exempt

### Amplicall 10

This tells you the telephone is ringing using a flashing light, audible alarm and optional vibrating pad. It's battery powered so you don't need a mains socket close to your telephone socket. The light flashes continuously when the phone rings and stops when the call is answered or the caller rings off.

- Loudness of approx 95dB at 1m (max setting)
- Adjustable volume control
- Choice of alert: flashing light and audible alarm, flashing light and vibrating pad (see accessories), or audible alarm and vibrating pad.
- Three ring tones
- Wall mountable
- Telephone lead of 3m
- Size: 120 x 140 x 55mm

#### T452 Amplicall 10

**£14.99** exc VAT

**£17.99** inc VAT

4 x AA batteries included

### Accessories

## CL2L Doorbell and telephone alerter

This amplified ringer lets you know when the telephone and doorbell are ringing, with flashing light and audible alarm, flashing light and vibrating pad (see accessories) or audible alarm and vibrating pad. An audible alarm is always produced when the doorbell is used. Three chime melodies are available.

- Loudness of approx 90dB at 1m (max setting)
- Volume and tone controls
- Optional vibrating pad for night time alerting
- Wall mountable
- Connects to telephone with 3m lead
- Mains power lead of 1.8m
- Wireless bell push range of up to 25m
- Size: 120 x 180 x 45mm

## Ringflash 200 with doorbell alert

This has exactly the same features as the Ringflash 100 (page 23) except it also alerts you to the doorbell with a different sounding ringer.

- Telephone ringer loudness of approx 84dB at 1m (max setting)
- Doorbell ringer loudness of approx 86dB at 1m (max setting)
- Choice of alert – flash and sound, flash and vibrating pad, or sound and vibrating pad
- Three ringer melodies
- A maximum of two bell pushes can be used
- Doorbell range of up to 60m
- Mains power lead of 2m
- Size: 130 x 120 x 120mm

### A253 Ringflash 200

**£19.99** inc VAT

### A253A Additional bellpush

**£13.33** exc VAT  
**£16.00** inc VAT

## Amplicall 20

The Amplicall 20 will alert you to the phone and doorbell with its flashing light, audible alarm and optional vibrating pad for night-time alerting. It can be powered by the mains or batteries so can be used anywhere in your home, although if you want to be alerted to the telephone it needs to be plugged into your phone socket, with the lead supplied.

- Loudness of approx 95dB at 1m (maximum setting)
- Choice of alert: flashing light and audible alarm, flashing light and vibrating pad (see accessories), or audible alarm and vibrating pad
- Adjustable volume control
- Choice of six ringer tones (three for each alert)
- Wall mountable
- Telephone lead of 3m
- Mains power lead of 3m
- Size: 120 x 140 x 55mm

## Accessories

### A177A vibrating pad

**£12.49** exc VAT  
**£14.99** inc VAT

## 26 Bellman paging system

### Bellman Visit 868 paging system

Instead of buying separate alerting products, you can buy one integrated system that alerts you on one handy device. The Bellman Visit 868 is a truly versatile and flexible paging system, ideal for use around the home. Using the appropriate transmitter (see pages 29-32) you can be alerted to different events.

It gives you 24-hour safety and support and lets you continue your daily life, so you won't miss visitors at your door, telephone calls, smoke alarms or a baby crying.

- Operating range of up to 200m, depending on obstructions
- Up to four different transmitters of the same type now identifiable on each icon (except smoke alarm)
- Up to a total of 13 alerts are possible on each receiver
- Wireless system offers greater freedom

**For full technical details please request a copy of the Bellman Technical Solutions brochure.**

#### **To make up your packs simply choose:**

- How you want to be alerted – from the receivers section on page 27-28 (six options)
- What you want to be alerted to – from the transmitters section on page 29-32
- If you need overnight cover – choose from the pager charger and/or vibrating pad on page 33

#### **To help you choose, we have grouped together a typical selection of products.**

Our suggested pack includes:

- Telephone transmitter
- Door transmitter
- Pager charger
- Vibrating pad
- Pager receiver
- Smoke alarm (ionisation) transmitter

**Receivers.** These receive the signal from the transmitters you choose and can alert you either by vibration, sound and light, or by a sequence of bright flashes, depending on which receiver you choose.

## Pager receiver

When using this pager receiver you can move freely around your home and garden, knowing that you can still be reached. It is small enough to put in your pocket or clip to the side of your belt. When a signal is received a different vibration pattern will alert you to which transmitter has been activated and the appropriate symbol will light up. For example, it could be someone at the door, the smoke alarm, your baby crying or the telephone ringing.

Different vibration patterns are produced for each alert, so blind and partially sighted people can also use this system. You can be notified to up to four different transmitters of the same type – for example, four baby alarm transmitters (this doesn't apply to smoke alarms transmitters).

For overnight use we recommend you use the pager charger B1260 and vibrating pad B1270 (see page 33). The charging cradle comes with a rechargeable battery and charging takes up to eight hours. You can connect up to two vibrating pads to use at night.

- Low battery status indicator
- Operating range of up to 200m
- Size: 86 x 57 x 29mm

### **B1470 Pager**

**£113.19** exc VAT

**£135.83** inc VAT

### **B9028 Additional rechargeable battery**

**£3.32** not VAT exempt

**For pager charger see page 33**

## Wrist receiver pack

Simply strap this wrist receiver to your arm and you can be alerted to the doorbell, telephone, smoke alarm and baby alarm when it vibrates. You can take it with you wherever you go in the house or garden. The wrist receiver comes with a charger and vibrating pad that you can pop under your pillow at night to wake you up if any of the transmitters are activated.

- Operating range of up to 100m
- Battery life of up to 30 hours from eight hours charge
- Size: 100 x 90 x 90mm (charger unit)

### **B8101 Wrist receiver pack (with vibrating pad and charger)**

**£132.72** exc VAT

**£159.26** inc VAT

## Accessories

### **B1560A Replacement rechargeable battery**

**£8.78** not VAT exempt

### Portable receiver

This alerts you to someone at the door, the telephone ringing, the baby crying or the smoke alarm. Its large size makes it useful if you have manual dexterity problems. It can also be mains powered with the B9202 optional power adaptor. One notable feature is the indicator which uses four different coloured symbols to show which transmitter has been activated. Up to four different transmitters of the same type can be identified on each icon (except smoke alarm). The volume level can also be adjusted up to 90dB. A vibrating pad can be connected for overnight use (see page 33).

- Size: 165 x 130 x 26mm

#### **B1450 Portable receiver**

**£63.94** exc VAT

**£76.73** inc VAT

4 x C batteries included

#### **B9202 Power adaptor**

**£18.25** not VAT exempt

### Alarm clock receiver

This alarm clock can also alert you to the telephone ringing, your baby crying, your smoke alarm or your doorbell. It can alert you in several ways: a loud audible alarm, four flashing lights and a vibrating pad that you pop under your pillow. Each of the four lights are as bright as a mobile phone camera flash. The amplified alarm uses a range of sound frequencies to suit different types of hearing loss. It also gets louder the longer you leave the alarm. The clock also features a soft blue night-light to guide you back to bed if you have to get up in the night.

- Battery backup that keeps all the alarm features working during a power cut.
- Size: 132 x 146 x 85mm

#### **B1580 Bellman Visit alarm clock receiver**

**£105.00** exc VAT

**£126.00** inc VAT

### Flash receiver

The flash receiver alerts you with bright, clear, distinct flashes and indicates the transmitter that has been activated by lighting different coloured symbols. Up to four different transmitters of the same type can be identified on each icon (except smoke alarm). The receiver can be placed on a table or be wall mounted (see wall bracket accessory on page 33).

Powered by the mains adaptor supplied, this unit must be plugged in at all times. You can also connect a vibrating pad to use it at night (see page 33).

- Size: 140 x 70mm

#### **B1440 Flash receiver**

**£73.51** exc VAT

**£88.21** inc VAT

### Portable flash receiver with backup batteries

This portable flash receiver has all the features of the B1440 Flash receiver (see above) but gives you added flexibility: just detach it after charging and use it in any room around the house

without any trailing cables.

- Size: 80 x 95 x 95mm

#### **B1540 Portable flash receiver**

**£71.95** exc VAT

**£86.34** inc VAT

**Transmitters.** These units pick up the sounds you need to be alerted to. They send a radio signal to a receiver of your choice.

### Door transmitter

The door transmitter will alert you to callers by picking up the sound of your existing doorbell. It also has a clever 'learn' function, so you can train it to recognise up to three different sounds. There is the added option of an external microphone if you have a remote or awkwardly placed doorbell, or an intercom. As an alternative to the door transmitter, please see the push button transmitter B1420 (right).

- Size: 140 x 90 x 36mm

#### **B1410 Door transmitter**

**£42.75** exc VAT

**£51.30** inc VAT

1 x 9V PP3 battery included

External microphone leads are available

(see accessories page 33)

### Push button transmitter

Use the push button transmitter as a doorbell or person-to-person alerter. For use as a doorbell, simply attach it outside your door. When pressed by your visitor, the unit will send a signal to the Bellman Visit 868 receiver of your choice.

For the person-to-person alerter, simply press the button to 'call' someone out of hearing range, for example a family member in the garden or a patient requiring their carer's attention.

- Ideal for indoor or outdoor use
- Complete with neck lanyard
- Size: 66 x 48 x 23mm

#### **B1420 Push button transmitter**

**£38.26** exc VAT

**£45.91** inc VAT

1 x V28PX battery included

### Accessories

#### **X732 Replacement battery**

**£6.74** not VAT exempt

### Telephone transmitter

The telephone transmitter alerts you to your textphone, telephone or fax machine. It comes with a lead and doubler to connect to your telephone socket. It can be used with the door contact switch B9023 and contact mat B9024 (see page 32).

- Size: 98 x 60 x 30mm

#### **B1430 Telephone transmitter**

**£38.42** exc VAT

**£46.10** inc VAT

1 x 9V PP3 battery included

#### **X734 Replacement doubler**

**£3.37** not VAT exempt

If you would like any help choosing your ideal combination of Bellman products, you can contact our Customer Service Team on the contact numbers below or email [solutions@hearingloss.org.uk](mailto:solutions@hearingloss.org.uk)

## 30 Bellman transmitters

### Baby cry transmitter

This transmitter helps to alert you when your baby is crying. Wireless and very easy to use, it can be placed on a table or wall mounted.

It has three sensitivity controls and you can regulate the time period before the receiver is activated. An additional feature is that you can use up to four baby cry transmitters - ideal if you need to know which child needs attention.

- Size: 145 x 80 x 36mm

#### **B1490 Baby cry transmitter**

**£78.36** exc VAT

**£94.03** inc VAT

1 x 9V PP3 battery included

### Smoke alarm transmitter - ionisation

Best suited for detecting explosive fires. We recommend that at least one smoke detector is placed on each level in a multi-storey house.

- Size: 128 x 50mm

#### **B1550 Ionisation smoke alarm transmitter**

**£59.45** exc VAT

**£71.34** inc VAT

1 x 9V PP3 battery included

### Smoke alarm transmitter - optical with heat sensor

This Bellman Visit 868 Smoke alarm transmitter can detect both smouldering fires and open fires. It has a safety feature that prevents you from fitting the unit without the battery.

- Size: 100 x 35mm

#### **B1480 Optical smoke alarm transmitter with heat sensor**

**£96.13** exc VAT

**£115.36** inc VAT

1 x 9V PP3 battery included

### Bellman Visit 868 Repeater

The Bellman Visit 868 Repeater allows you to extend the operating range of the Bellman Visit 868 system so you can receive signals over a greater distance. For indoor use only. The repeater doesn't work with the old 433 Visit system.

- Size: 98 x 60 x 30mm

#### **B1510 Repeater unit**

**£101.47** exc VAT

**£121.76** inc VAT

1 x 9V PP3 battery backup included

### Bellman Visit 868 Bridge for Bellman Visit 433 system

This bridge unit means you can continue to use the earlier Bellman Visit 433 system with most Visit 868 components. The bridge cleverly transfers the signal between the two systems.

- Size: 98 x 60 x 30mm

#### **B1520 Bridge unit**

**£45.21** exc VAT

**£54.25** inc VAT

1 x 9V PP3 battery backup included

The separate components of the system were just as described in the catalogue, came well packaged with simple, clear instructions on setting up a multi-alerting system. I am so relieved that I could easily install the system myself. I am now enjoying peace of mind knowing I will be alerted by the flashing light and vibrator to my telephone, intruder alarm and smoke detector. An excellent system.

Grace McNicol, Glasgow

## 32 Bellman transmitters

### Carbon monoxide detector

This is a carbon monoxide detector with a connected transmitter.

- Lead length of approx 190mm
- Size: 100 x 85 x 57mm (detector) 98 x 60 x 30mm (transmitter)

#### **B143CO Carbon monoxide detector**

**£97.83** exc VAT

**£117.40** inc VAT

2 x 9v PP3 battery included

### Door contact switch

This switch can detect when a door or window is opened. Must be used with the B1430 Telephone transmitter (page 29) or B1580 Alarm clock receiver (page 28).

- Size: 62 x 25 x 13mm

#### **B9023 Magnetic door contact switch**

**£5.22** exc VAT

**£6.26** inc VAT

### Contact mat

A pressure mat can be used to alert you to someone entering the room or your property. It can also alert a carer or parent that their patient or child has got out of bed.

- Must be used with the B1430 Telephone transmitter (page 29) or B1580 Alarm clock receiver (page 28)
- Not advisable for outside use
- Size: 745 x 420 x 3mm

#### **B9024 Contact mat**

**£26.21** exc VAT

**£31.45** inc VAT

### Pager charger

Mains powered recharger for both the Visit 433 and Visit 868 Pagers.

- Can take up to two vibrating pads (see right)
- Only use with rechargeable battery for the pager. Do not attempt to recharge standard batteries
- Size: 88 x 78 x 43mm

#### **B1260 Recharging cradle**

**£39.19** exc VAT

**£47.03** inc VAT

### Vibrating pad

This vibrating pad works with all Bellman receivers or their chargers and provides night-time cover. Simply place it inside your pillowcase and it will vibrate to wake you up.

- Size: 88 x 88 x 27mm

#### **B1270 Vibrating pad**

**£11.75** exc VAT

**£14.10** inc VAT

## Accessories

#### **B9075 Flash receiver wall mounting bracket**

**£3.74** not VAT exempt

#### **B9199 Door transmitter external microphone – 2.5m**

**£5.38** not VAT exempt

#### **B9200 Door transmitter external microphone – 0.75m**

**£4.98** not VAT exempt

**With these accessories to your Bellman Visit 868 Door transmitter you can connect remote doorbells and intercoms (see page 29).**

#### **B9202 Portable receiver power adapter**
