Communication tips
for speaking to someone with hearing loss

Action on Hearing Loss
actiononhearingloss.org.uk

Always ask: even if someone’s wearing a hearing aid, ask if they need to lipread you.

Make sure you have the person’s attention before you start speaking.

Find a place to talk that has good lighting, away from noise and distractions.

Turn your face towards them so they can easily see your lip movements.
Speak clearly, not too slowly, and use normal lip movements, facial expressions and gestures.

**Make sure** what you’re saying is being understood.

If someone doesn’t understand what you’ve said, try saying it in a different way.

**Keep your voice down:** it’s uncomfortable for a hearing aid user if you shout, and it looks aggressive.

**Get to the point:** use plain language and don’t waffle.

If you’re talking to one person with hearing loss and one without, focus on both of them.
